Professional Summary

Data Engineer and Technical Consultant with hands-on experience in ETL/ELT development, data migration, data quality validation, and enterprise data management. Experienced in building Python automation, designing SQL-based data workflows, validating data across systems, and preparing technical documentation for internal teams and client stakeholders. Skilled in SQL, Python, IBM DataStage, Power BI, Tableau, and data warehouse concepts, with project exposure to Apache Phoenix and Apache Impala.

Core Competencies

- Data Engineering: ETL/ELT development, data integration, pipeline automation, schema design
- Data Quality: data profiling, cleansing, validation rules, anomaly detection, root cause analysis
- Data Warehouse: dimensional modeling, star schema, slowly changing dimensions, reporting layers
- Big Data: Apache Phoenix, Apache HBase, Apache Hive, Apache Impala, PySpark
- Analytics & BI: Power BI, Tableau, exploratory data analysis, dashboard development
- Tools: SQL, Python, IBM DataStage, Git, GitHub, MATLAB
- Collaboration: stakeholder communication, documentation, testing, business requirement alignment

Professional Experiences

Technical Consultant – PT. IDX Consulting (Jakarta, Indonesia)

March 2023 – Now

- Contributed to the Antasena Bank Indonesia project as a Data Engineer, developing ETL pipelines to migrate data from Apache Impala to Apache Phoenix, improving processing efficiency.
- Built Python automation scripts that reduced repetitive manual processing by more than 50%.
- Performed root cause analysis for data inconsistencies, mismatches, and quality issues across source and target systems.
- Prepared ETL mappings, validation documentation, and technical materials for internal teams and client presentations.
- Conducted end-to-end testing based on Bank Indonesia business requirements and data reporting rules.
- Collaborated with analysts, developers, and data owners to align data quality checks, mapping logic, and issue resolution.

Research Assistant – Bandung Institute of Technology (West Java, Indonesia)

July 2022 – December 2022

- Collected, processed, and analyzed oceanographic field data for coastal water research.
- Used Python and MATLAB to support data processing, visualization, and research analysis.
- Assisted with drafting, visual design, and preparation of scientific publication materials.
- Contributed to the published book Pengamatan Perairan Cirebon by ITB Press.

Selected Projects

End-to-End Data Pipeline & BI Dashboard

- Built an ETL pipeline for Superstore sales data, including raw CSV ingestion, validation, transformation, PostgreSQL loading, SQL analysis, and Power BI reporting.
- Implemented modular Python scripts for extraction, validation, transformation, loading, and logging.
- Repository: <https://github.com/jonisy1406/PortofolioJoniSyofian/tree/main/data-pipeline-project>

Tableau Dashboard Portfolio

- Developed Tableau dashboards for online store and banking datasets, focusing on business metrics, trend analysis, and interactive data storytelling.
- Portfolio: <https://public.tableau.com/app/profile/joni.syofian/vizzes>

Data Analytics Portfolio

- Completed analytics projects covering SQL, Python-based EDA, visualization, customer analysis, and machine learning fundamentals.
- Repository: <https://github.com/jonisy1406/PortofolioData>

Oceanographic Research

- Supported coastal water research through data collection, processing, analysis, and visualization using MATLAB and Python.
- Publication: <https://www.itbpress.id/pengamatan-perairan-cirebon/>

Education

Bachelor of Science – Bandung Institute of Technology
Data Science Program - Rakamin Academy

July 2018 – October 2022
July – November 2022

Achievements, Past Projects, and Other Experiences

- [Selected as a finalist](#) to pitch a breakthrough idea titled “Data-Driven Dashboard for Understanding the Characteristics of Ocean Wave and Wind Conditions on Indonesia Fisheries Management Area 711”.
- Served as Assistant Lecturer and Practical Assistant for statistics courses for three consecutive semesters.
- Created an [EDA dashboard](#) to analyzed csv files using python. ([other portfolios](#))
